

Dear Dr de Silva

I am writing to inform you that I have responded very well to Mirtazipine and that my Depressive mood condition has been completely abated.

I have recently returned from Jamaica where I decided to spend two months living in my original family home.

On my return I moved back to Birmingham, the majority of my family reside in this city and I am in frequent contact with them now.

I have also withdrawn an application from the Department of Work and Pensions for Personal Independence Payments.

I would like to thank you for the psychiatric support you offered me.

Yours sincerely
